INDUSTRY PROFILES 2007

May 20, 2008

824–155 Carlton St.
Winnipeg, Manitoba
R3C 3H8

- **Manitoba's Industrial Real GDP at basic prices grew 3.0% in 2007 to reach $37.7 billion. Following on the heels of a 3.3% rise in 2006, the province's economy has averaged 3.0% growth over the past four years**.

- **The finance, insurance, real estate and leasing sector helped lead the way in 2007 growing by 3.6% in real terms. This followed 3.0% real growth in 2006 and a 3.4% increase in 2005. The 2007 results were boosted by increases in all relevant sub-sectors leading to the overall industrial share of 18.9%.** Among the sub-sectors, finance, insurance and real estate lead the way with a 3.9% gain, up from a 3.5% increase recorded in 2006. Owner-occupied dwellings meanwhile saw a solid 3.2% increase in 2007 following a 2.3% rise in 2006.

- **In 2007, the manufacturing sector grew by 2.6% contributing $4.7 billion to real GDP.** This marked a rebound from a 0.2% decline in real growth recorded in 2006. **During the past year, the sector accounted for 12.4% of provincial industrial production.** Sub-sector results were however varied. Transportation equipment, fabricated metal products, machinery and primary metal production all had strong growth in 2007. Weakness however was noted in the wood products, plastics, furniture, beverages and food processing sub-sectors, which all saw declines in product shipments.

- Despite pockets of weakness, **manufacturing sector exports rose 3.2% in 2007 up from 1.5% in 2006. On the import side, domestic demand fed by excellent income growth, a continued rise in real estate values (wealth effect) and a stronger dollar resulted in an 8.1% increase in imports of manufacturing goods. This followed a 7.5% increase a year earlier.**

- **For Manitoba, 2007 was in many ways the year of the consumer as retail trade grew by 7.4% almost double the 3.8 % real growth recorded in 2006.** The past year's surge in consumer spending sparked the best performance by the province's retailers in a decade. Supported by strong income growth, more affordable imports and continued strength in the residential construction sub sector, sales of home furnishings and supplies rose by more than 10%. Retail figures for recreational vehicles also figured strongly as overall sales by motor and recreational vehicle dealers jumped a robust 8.9%. As a result, **the retail sector's industrial share increased to 6.8% in 2007 up from 6.6 % a year earlier.**

- **The construction sector grew by an estimated 10.1% in 2007 lead by residential, and repair activity. Manitoba's construction industry has now recorded five straight years of real growth, its real GDP reaching $1.9 billion and its industrial share 4.9%.**

- **On the residential side, 2007 saw housing starts rise for a seventh consecutive year. Province-wide, the number of new units built rose 14.1% to reach 5,788, breaking the 5000 unit mark for a second year running.** Growth was lead by a notable 32.3% jump in the construction of apartments and condos which saw 1508 units built. Interestingly, the latter represents more than a fifteen fold increase since the year 2000 which saw only 97 units of these types constructed.

- **Repair and other construction continued to support overall sector growth rising an estimated 12.4% in 2007.** Another year of strong increases in personal disposable income and rising real estate values encouraged homeowner's to investment in their properties in 2007 - a process aided by low interest rates and good access to capital.

- **Real value added in the transportation and warehousing sector, grew by 3.6% in 2007 a solid improvement from the 2.4% growth it recorded in 2006. As a result, the transportation and warehousing sector's industrial share rose to 6.9% up slightly from 6.8% in 2006.** Last year's economic performance was lead by air transportation sub-sector which expanded by an estimated 4.5% and by the rail carriers who rebounded from a static 2006. Warehousing and storage activity also remained strong capitalizing on the province's robust retail and wholesale performance.

- Last year, the Winnipeg Airports Authority reported a 5.4% rise in passenger landings as well as record freight activity. In terms of rail traffic, both CN and Canadian Pacific Railway saw stronger growth fueled by demand for Manitoba agricultural commodities notably grains and oilseeds. The province's motor carriers meanwhile continued to struggle with rising fuel costs and an economic slowdown in key markets south and east.

- **Benefitting from continued economic strength throughout Western Canada, real GDP in the wholesale trade sector rose 6.3% in 2007,** up significantly over a 2.1% increase recorded in 2006. As a consequence, the sector's industrial share increased to 5.8% from 5.6% in 2006.

- **The utilities sector declined 3.2% in 2007 down a second year running as lower water levels slowed electricity generation.** In 2006 the sector had recorded a 5.5% decline. Hydro exports for 2007 were down 7.1% in megawatt hours transmitted and 18.9% in revenue terms.

- **Following Manitoba agriculture's huge rebound in 2006, a year that saw a 27.1% surge in real GDP, sector production dropped $65 million or 3.9% in 2007. This resulted in the agriculture's industrial share slipping to 4.3% from 4.6% in 2006.** The 2007 crop results tracked slightly lower coming as they did on the heels of an exceptional harvest in 2006 - one that included an all time Manitoba record for Canola production.

- On the livestock side, production was relatively stable in 2007 but in the face of declining prices cattle producers reduced the number of calves shipped by more than 50%. Overall commercial marketing's of cattle rose marginally. A signal of a sector in transition, the number of hogs exported internationally increased significantly in 2007 but the average weight of animals shipped fell for a third straight year as increased numbers of weanlings were sent south. Estimated marketing's of slaughter hogs meanwhile suffered an almost double digit drop.

- **On the strength of rising commodity prices in 2007, Manitoba's Mining, Oil and Gas sector** is estimated to have again **set an all-time record for value of production at $3.1 billion.** The sector's industrial share of provincial real value added was 2.0 in 2007 down slightly from 2.1% in 2006.

- **On the mining side, 2007 saw the value of Manitoba production hit $2.5 billion, another all-time high.** This was up $400 million from the $2.1 billion mark it recorded in 2006. **In the oil and gas sub-sector, provincial oil production edged up an estimated 2.8% with value of oil produced estimated at $600 million.** Following a year of extraordinary exploration activity in 2006, drilling activity dropped back somewhat in 2007. The number of new oil wells drilled reached 324 down 32% from 2006 when a record 478 wells were drilled. In terms of actual meters drilled, activity dropped only 26% as the proportion of longer horizontal wells increased.

- **2007 marked a year of double digit increases for new and existing home values accompanied by record sales volumes. This resulted in strong growth for the real estate sub-sector**. Increases in residential rental markets lead to significant gains in the management of companies (property management) category. Following a 5.2% rise in 2006, **real GDP for real estate, leasing and management of companies increase 4.5% in 2007.**

- **In 2007, the information and culture sector saw real GDP growth of 3.4% reaching an estimated $1.3 billion. This was up slightly from a 2.7% increase a year earlier.** The sector, which includes broadcasting, motion picture and video production and telecommunications, saw its **industrial share remain unchanged at 3.3%.** In telecommunications, the largest component of this sector, high-speed internet products and cellular phone services again contributed strongly to overall growth. This continued the trend of rapid displacement of landline telephones and other older product lines as revenue generators for the sector.

- **Professional, Scientific and Technical services sector rebounded strongly in 2007 with an estimated 5.0% rise in real value added to reach $944 million**. This followed a 2.8% decline a year earlier. For 2007, the sector's industrial share remained unchanged at 2.5%. According to Statistics Canada's labour force survey (LFS) data, **provincial employment in professional, scientific and technical services hit 25,400 up 8.5% from 2006**

- **Riding a surge in the trade of grains and oilseeds, the province's total real exports rose by 3.6% in 2007. This followed a 2.7 % increase in 2006. A surprisingly resilient manufacturing sector contributed to last year's increase with a 3.2% jump on its own accord.** This helped to offset an estimated 6.8% decline in exports by the province's utility sector.

- **In 2007, total real import levels increased 6.1% following a 7.2% rise in 2006. Solid income growth, a hot housing market and cheaper imports due to a stronger Canadian dollar served to support** the importation of a wide range of products in 2007. Areas of particular strength included furniture and fixtures, machinery and equipment, electrical, electronic and communication products and transportation equipment.

- **Manitoba's total capital investment lead all provinces in 2007 rising 16.8% to reach $9.2 billion**. Last year, the top five Manitoba industries for new investment were housing ($2.0 billion), public administration ($1.4 billion), utilities ($1.0 billion), transportation and warehousing ($0.7 billion) and Fire and Insurance ($0.7 billion).

- Statistics Canada reported that **2008 capital investment intentions for Manitoba are up by 18.8% or $1.7 billion. Manitoba's investment growth again is expected to lead all provinces**. The top three industries for new investment are expected to be housing ($2.2 billion), the transportation and storage sector ($1.6 billion) and the utilities sector ($1.5 billion).

- **Manitoba's Real GDP at basic prices reached a level of $37.7 billion in 2007. Last year, the economy employed 596,500 people working an average of 33.8 hours per week.**

- **According to the Labour Force Survey (LFS), Manitoba's employment grew by 1.6% or 9,500 new jobs in 2007.** The LFS indicates that in 2007 provincial employment was greatest in the health care and social assistance sector, which employed 79,800 workers, and in the manufacturing sector which averaged 70,600 employees for the year.

- **Average hourly wages rose in Manitoba by 5.0% in 2007 rising to $18.42 from $17.55 in 2006.** Utility sector employees receive the highest hourly wages at $26.78. This was followed by remuneration for public administration at $25.12 and for mining and other primary industries at 24.77 per hour.

NOTE TO USERS

This publication provides preliminary annual figures for the industrial performance of the Manitoba economy from 2002 to 2007.

It should be noted that the NAICS industry groups differ from table to table, depending on how the survey information is aggregated.

This report is a supplement to "The Manitoba Economy: Preliminary 2007 GDP Performance with Industry Sectors" released by the Manitoba Bureau of Statistics (MBS) on March 11, 2008. This report focuses on the industrial performance of the economy while the earlier report provided information on the income and expenditure accounts.

The real GDP at Basic Prices by industry provided in this publication is based on a Laspeyres index while the income and expenditure accounts are based on a Fisher index.

MBS categorizes business enterprises into industries using the North American Industry Classification System (NAICS). **NAICS is based on a strict production-oriented framework where establishments are grouped into industries according to their similarity in the production process required to generate goods and services.** It is more useful to use a production-oriented approach to bring together establishments with common input structure and to compile data on their product outputs.

This report includes GDP industrial exports and imports data for Manitoba. Since real GDP basic prices data for exports and imports is not available, this report provides industrial trade data on the market prices basis. This data is included to show Manitoba's external trade position. It should be noted that all exported items are not necessarily produced in the province.

MBS is the source for the information contained in Tables 1 to 6. The data source for industrial employment, average hourly wage rates and the actual hours worked (Tables 7 to 10) is Statistics Canada's **Labour Force Survey.** Tables 11 and 12 on investments are from Statistics Canada's **Public and Private Investments Survey (PPI).**
